

SANMINA-SCI®

COMPANY OVERVIEW

WHAT WE MAKE, MAKES A DIFFERENCE™

ABOUT SANMINA-SCI®

Sanmina-SCI® Corporation makes some of the most complex and innovative optical, electronic and mechanical products in the world. As a leading integrated manufacturing services company, with revenue totaling USD \$6.6 billion for fiscal year 2011, Sanmina-SCI provides custom design and manufacturing, plus global supply chain solutions to high technology Original Equipment Manufacturers (OEMs).

Sanmina-SCI maintains a network of highly sophisticated design, quick-turn, New Product Introduction (NPI) facilities and repair centers, in addition to an impressive global network of manufacturing operations in 23 countries on six continents. Each day, in every region of the world, 24/7, Sanmina-SCI designs, manufactures, ships and repairs complex, mission-critical products. For the past 30 years, customers have come to expect quality, delivery, reliability and service from Sanmina-SCI. Together we build productive relationships based on exceptional customer satisfaction. What we make, makes a difference.

Sanmina-SCI's Dedicated Industries:

- Communications Networks
- Medical Systems
- Defense & Aerospace Systems
- Industrial & Semiconductor
- Enterprise Computing & Storage
- Clean Technology
- Multimedia
- Automotive

Key Technology Components:

- Complex multi-layered printed circuit boards
- Backplanes
- Cables
- Enclosures, machining, casting & plastics
- Storage & memory solutions
- Optical, RF/Microwave solutions

A COMMITMENT TO CUSTOMERS, TECHNOLOGY AND MAKING A DIFFERENCE.

Today, more than ever, customers of all sizes, geographic locations and industries choose Sanmina-SCI as a trusted partner. Sanmina-SCI delivers value through design and engineering, high technology component and product solutions, Build-to-Order (BTO) and Configure-to-Order (CTO) expertise, logistics and post-manufacturing repair/warranty, and product life-cycle management services.

Sanmina-SCI's emphasis on innovative technology, quality and complete end-to-end supply chain solutions enables its customers to compete in the global marketplace. Whether Sanmina-SCI is designing and prototyping products in one of our New Product Introduction (NPI) centers, launching new products in one of its best-cost campuses, deploying personnel immediately to meet a customer's demand or delivering shipments, Sanmina-SCI takes every measure to ensure it makes a difference for every customer.

INNOVATION

Service means the ability to understand and focus on customer needs. Sanmina-SCI strives to continuously improve its day-to-day operations based on feedback primarily from its customers. With experienced design and engineering personnel distributed across the company's divisions, Sanmina-SCI helps advance its customers' technologies and products by fostering innovation and long-lasting partnerships. Sanmina-SCI has the technological know-how to prototype and launch a new product, plus has decades of experience driving down manufacturing costs while solving complex supply chain management issues. These services are a clear reason why the largest technology brands in the world value and partner with Sanmina-SCI.

OPERATIONS EXCELLENCE AND INFORMATION TECHNOLOGY STRATEGY

In order to secure every possible advantage for its customers, Sanmina-SCI continues to invest in its information technology (IT) system, operations infrastructure and quality systems. With a world-class IT capability and organization, Sanmina-SCI ensures global consistency and superior supply chain visibility for each customer — anywhere in the world. Best-in-breed software tools and technology includes applications in product design and engineering, order and production status, material planning and logistics, and supply chain management. These tools are consistently applied in all of Sanmina-SCI's operations, providing customers with a consistent experience across the entire organization. In addition, Sanmina-SCI has proprietary process data collection and quality management tools developed internally. These tools provide real-time visibility of critical quality data to Sanmina-SCI management and customers, helping ensure that the products designed and produced have the highest quality possible.
