

## Sanmina Corporation

### Conflict Minerals Report

For The Year Ended December 31, 2015

#### I. Company Background

Sanmina Corporation (“Sanmina”, the “Company”, “we”, “us”, or “our”) is a leading global provider of integrated manufacturing solutions, components, products and repair, logistics and after-market services. We provide these comprehensive offerings primarily to original equipment manufacturers, or OEMs, in the following industries: communications networks, storage, industrial, defense and aerospace, medical, energy and industries that include embedded computing technologies, such as point-of-sale devices, casino gaming and automotive.

#### II. Performance of Due Diligence on the Source and Chain of Custody of Conflict Minerals

We believe that substantially all of the electronic and electro-mechanical products we manufactured for our customers during 2015 include components that contain Conflict Minerals(1) necessary to the functionality of such products. As a result and as required by Rule 13p-1 under the Securities Exchange Act of 1934 (the “Rule”), we surveyed and performed a reasonable country of origin inquiry (“RCOI”) on a subset of our supplier group that we determined provided components containing Conflict Minerals. The purpose of the RCOI was to determine whether or not the source of such Conflict Minerals was one of the Covered Countries(2) or whether such Conflict Minerals came from recycled or scrap sources.

Based upon our RCOI, we know or have reason to believe that some components used in some of our customers’ products manufactured during 2015 contained Conflict Minerals originating from the Covered Countries and further that such Conflict Minerals were not sourced solely from recycled or scrap sources. As a result and as also required by the Rule, we undertook further due diligence on a smelter group identified to us by our suppliers as providing Conflict Minerals that originated in the Covered Countries. The purpose of this further due diligence was to attempt to ascertain whether the sourcing of Conflict Minerals from these smelters or suspected smelters benefitted armed groups in the Covered Countries. We performed this due diligence in conformity with the Organization for Economic Co-operation and Development Due Diligence Guidelines for Responsible Supply Chains of Minerals from High Risk Areas (the “OECD Guidance”) and related supplements.

#### III. Design of Due Diligence Process and Alignment to the OECD Guidance

##### A. Establishment of Strong Internal Company Management Systems

- A Conflict Minerals working group led by our global supply chain organization has established and implemented our Conflict Minerals Policy and regularly reports on its activities to company senior management;
- We use the Conflict Minerals Reporting Template (the “Template”)(3) developed by the Electronic Industry Citizenship Coalition (the “EICC”) to collect Conflict Minerals information from our suppliers;
- We include in our supplier requirements documents and contracts provisions requiring suppliers to recognize our policy and to participate in our RCOI and due diligence activities;
- We maintain records of our RCOI and due diligence activities consistent with our record retention policy; and
- We provide a grievance reporting system that allows reporting of concerns, including those related to Conflict Minerals.

##### B. Identification and assessment of risks in the supply chain

- We employ procedures to identify suppliers which may potentially supply components containing Conflict Minerals;
- We ask these suppliers to report their Conflict Minerals sourcing activities using the Template in an attempt to identify the smelters and refiners involved and the country of origin of such Conflict Minerals;

---

(1) Conflict Minerals are defined as tin, tantalum, tungsten and gold.

(2) Under the Rule, the Covered Countries are defined as the following countries: Angola, Burundi, Central African Republic, the Republic of the Congo, Rwanda, South Sudan, Tanzania, Uganda and Zambia.

(3) The Template was developed to facilitate disclosure and communication of information regarding smelters that provide material to a company’s supply chain.

- We follow up with suppliers who do not respond by the deadline, requesting their responses;
- We compare smelters and refiners identified by our suppliers against the EICC/GeSI Conflict Free Smelter List (the “Conflict Free Smelter List”)(4) and other third party audit programs; and
- We document country of origin information using various third party sources, such as the smelter database maintained by the EICC/Conflict Free Sourcing Initiative.

C. Design and implementation of a strategy to respond to such risks as they are identified

- We contact direct suppliers to obtain additional information regarding smelters or refiners who may pose a risk of supplying Conflict Minerals that directly or indirectly benefit armed conflict in the Covered Countries;
- We work to improve our suppliers’ understanding of the Rule and to improve their response rate to our queries and the quality of their responses, primarily through enhancing our supplier requirements documents and through follow-up conversations during our due diligence process;
- We utilize the Conflict Free Smelter List to identify smelters not participating in the Conflict Free Smelter Program operated by the Conflict Free Sourcing Initiative (“CFSI”) and request, through the suppliers that have identified them, that they participate in such program;
- We bring to the attention of our customers the discovery of information that leads us to conclude that the sourcing of components or materials for our engagement with them if required by them benefits armed groups in the Covered Countries;
- When the decision of components sourcing is within our control, we will take steps over time to utilize suppliers who do not source their Conflict Minerals from the Covered Countries or who participate in conflict-free smelter programs; and
- Our Conflict Minerals working group reports the results of our due diligence efforts to Company management and the Audit Committee of our Board of Directors.

D. Support industry organization to carry out third party audits of smelters and refiners facilities and processes

- We maintain membership in the EICC, which develops and implements audit procedures for refiners and smelters.

E. Report on Due Diligence measures

- We publicly disclose our Conflict Minerals policy on our corporate web site at <http://www.sanmina.com/company-profile/conflict-minerals-policy/index.php>; and
- We publicly report on our due diligence efforts on an annual basis through this Conflict Minerals Report available at <http://www.sanmina.com/company-profile/conflict-minerals-information/index.php>.

**IV. Description of Due Diligence Measures performed**

- A. We conducted a survey of suppliers whose products may include Conflict Minerals using the Template.
- B. We evaluated suppliers’ responses to the Template questions, identified inconsistencies and answers requiring follow-up, and followed up with those suppliers to clarify their responses.
- C. We retained an independent due diligence firm to provide us with further information about the smelters identified to us through our due diligence process.
- D. We confirmed whether the smelters identified by our suppliers through the Template were included on the Conflict Free Smelter List.
- E. For smelters not included on the Conflict Free Smelter List, we requested, through the suppliers that identified them, that they participate in such program.

---

(4) The Conflict Free Smelter List is generally understood to contain the names of smelters from whom procurement of Conflict Minerals does not benefit armed groups in the Covered Countries. However, we do not express an opinion as to whether or not the sourcing of Conflict Minerals from these smelters actually does not benefit armed groups in the Covered Countries.

## V. Additional Information

### A. Facilities Used to Process Necessary Conflict Minerals

Below is a list of smelters and refineries that we believe, based upon our due diligence, were used to process the Conflict Minerals contained in our products during 2015.

<u>Metal</u>	<u>Smelter or Refinery Facility Name</u>
Gold	Advanced Chemical Company**
Gold	Aida Chemical Industries Co., Ltd.*
Gold	Aktyubinsk Copper Company TOO
Gold	Al Etihad Gold Refinery DMCC

\*Smelter Name included on Conflict Free Smelter and Refiner List published on the CFSI website as of March 25, 2016.

\*\* Smelter Name included on the Active Smelters and Refiners List published on the CFSI website as of March 25, 2016.

\*\*\* Smelter Name included on the TI-CMC Category A Members List Progressing toward CFSP validation published on the CFSI website as of March 25, 2016.

#### B. Country of Origin of Necessary Conflict Minerals Contained in Sanmina Products. If Known

As a result of our efforts to determine the mine or location of origin of Conflict Minerals used in our products, as described in Section C below, we believe the countries of origin of the Conflict Minerals used in our products include:

Angola, Argentina, Australia, Austria, Belarus, Belgium, Bolivia, Brazil, Burundi, Cambodia, Canada, Central African Republic, Chile, China, Colombia, Côte D'Ivoire, Czech Republic, Democratic Republic of Congo, Djibouti, Ecuador, Egypt, Estonia, Ethiopia, France, Germany, Guyana, Hong Kong, Hungary, India, Indonesia, Ireland, Israel, Japan, Kazakhstan, Kenya, Laos, Luxembourg, Madagascar, Malaysia, Mexico, Mongolia, Mozambique, Myanmar, Namibia, Netherlands, New Guinea, Nigeria, Peru, Philippines, Poland, Portugal, Republic of Congo, Russia, Rwanda, Sierra Leone, Singapore, Slovakia, South Africa, South Korea, South Sudan, Spain, Suriname, Switzerland, Taiwan, Tanzania, Thailand, Uganda, United Kingdom, United States of America, Vietnam, Zambia

#### C. Efforts to Determine Mine or Location of Origin

Our efforts to determine mine or location of origin of Conflict Minerals used in our products consisted primarily of our participation in the EICC and our review of information reported by our suppliers. As described above, we obtain smelter information, including when reported, mine or location of origin, from our suppliers using the Template. In addition, we sought additional information on mines and locations of origin using the CFSI's Smelter Database. Finally, we retained an external consultant to review any additional publicly available information regarding mines and locations of origin for the smelters reported to us by our suppliers.

D. Steps to Improve Our Due Diligence in 2016

- In situations in which we control the sourcing decision, we will encourage suppliers which have reported use of smelters not listed in the Conflict Free Smelter List in the past to cause the such smelters to participate in the Conflict Free Smelter Program or similar programs.
- We will use information gathered for our 2015 Conflict Minerals reporting activities to refine the list of suppliers to which we send the Template and to focus more outreach efforts on suppliers who have in the past provided information requiring further validation.
