

SANMINA

Precision Machining

Specializing in
Prototype to
Production
Machining

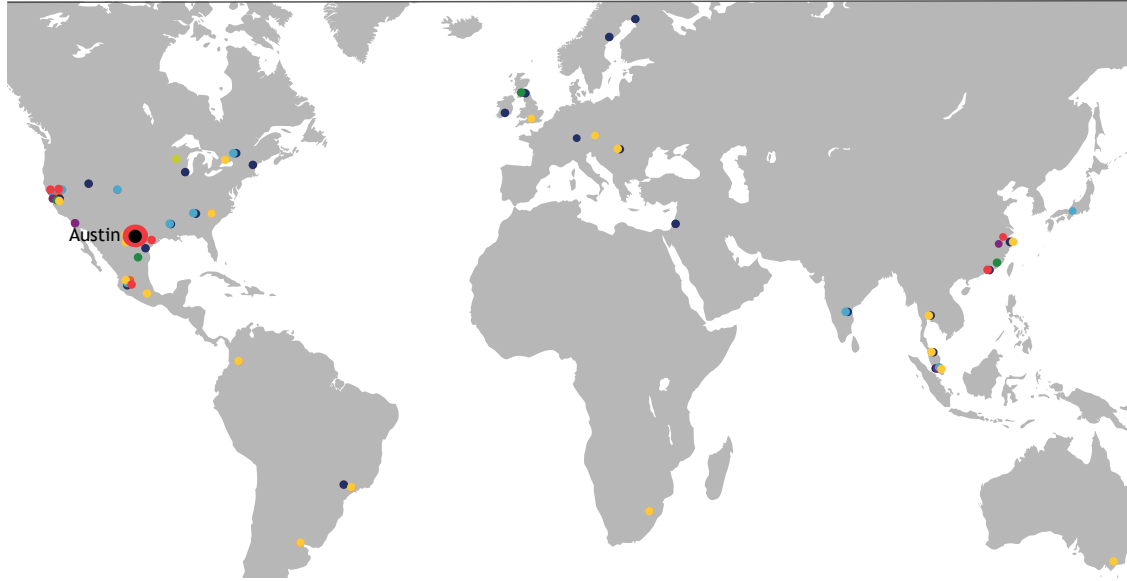

Austin, Texas

The Sanmina facility in Austin, Texas provides precision machining and mechanical assembly services to customers. Precision machining capabilities include vertical milling, horizontal milling, and turning on a wide range of materials including aluminum, copper, composites, stainless titanium and high alloy steel with a milling envelope of up to 60" x 50" x 40". The facility specializes in high-mix, low volume production and also offers sub-assembly, integration, New Product Introduction services and cleanroom assembly.

Sanmina Worldwide

Manufacturing Capabilities

- NC Machining
- CNC Turning
- Vacuum Welding
- Finishing/Deburring
- Mechanical Assembly
- Clean Room and Non-clean Room Electro-mechanical Assemblies
- Subsystem and Module Integration
- Custom Machining of Aluminum, Stainless Steel, Titanium, Plastic and Carbon Steel
- Prototype Development
- Technical Welding
- Configuration Management

Engineering Capabilities

- New Product Introduction (NPI)
- Design for Manufacturability
- Concurrent Engineering
- Gage/Fixture Design
- CAD/Modeling
- Test Fixture Development
- Tolerance Evaluation

Testing Capabilities

- CMM Part to Print/Model
- Mechanical/Optical Inspection
- Vacuum Leak Testing

Technologies

- High-speed Machining
- FMS Machining (Unattended)
- Hybrid Machining/Turning Cells
- Lean Manufacturing Methodologies
- Helium Leak Detection: 1x10⁻⁹ ATMC C/SEC

Logistics Services

- JIT Warehousing
- Custom VMI and Kanban Programs
- Domestic or International Shipping
- Hub Services

Certifications

- ISO 14001
- ISO 9001

CABLES
