

SANMINA

Sanmina Global Services(SGS)

Providing Low-Cost, Quickturn Repair Services and Logistics to Brazil

Sao Paulo, Brazil

Sanmina Global Services (SGS) provides comprehensive and low-cost logistics and repair services to Brazil. Our Sao Paulo facility is strategically located in the district where many international high technology companies have their facilities. Our facility helps these and other international companies extend their supply chains worldwide with comprehensive aftermarket

services. SGS Sao Paulo has over 20 years experience performing a broad range of logistics and aftermarket services including no-fault found (NFF) screening, repair, refurbishment, software and configuration management, inventory management programs, and product reclaim and recycling services. We also offer other regional engineering services, including failure analysis and reporting, sustaining engineering for legacy products, and test generation and process development. Also as part of Sanmina's global network of service facilities, Sao Paulo can optimize freight and international trade costs, delivering products on time, anywhere in the world.

Advanced Logistics and Repair

Sanmina is the premier partner for integrated manufacturing solutions and end-to-end services for Original Equipment Manufacturers. Our Sanmina Global Services (SGS) organization enables customers to concentrate on their core business, with Sanmina optimizing their supply chain. Having become one of the world's most advanced logistics and repair organizations, SGS creates value by offering deployment and after-market services, end-of-life solutions and engineering services. With a single global IT system, SGS delivers real-time information and reporting, optimizing supply chain assets and costs for our customers. Our global footprint consists of 28 Sanmina Global Services sites and more than 30 partner-managed locations spanning 38 countries on six continents.
