

SANMINA

Sanmina Global Services (SGS)

Enabling Customers to Focus on Their Core Business

Brno, Czech Republic

The Sanmina Global Services (SGS) Brno facility provides comprehensive logistics and repair services for a broad range of enterprise products, mobile computing, communications infrastructure, scanner, printer and wireless (RF) products. The facility combines skilled engineering, low-cost labor and

strong I.T. infrastructure to provide superior forward and reverse logistics services across Europe. With years of experience in the region, the SGS Brno facility provides our clients with knowledge and resources to manage complex customs and cross border business. It offers a broad range of logistics and repair services including configuration, integration services, inventory management programs, after market, and end of life solutions.

Four levels of repair are provided including Level 1: Unit swap, software re-load & cosmetic repair; Level 2: sub-assembly replacement & re-test; Level 3: sub-assembly repair including PCBA, display & scanners; Level 4: component repair on a sub-assembly including PCB pad & track repair, BGA repair including underfill, recovery, harvesting & testing of components.
