

SANMINA

## Sanmina Global Services (SGS)

Enabling Customers to Focus on Their Core Business

Melbourne, Australia

The Sanmina Global Services (SGS) Melbourne facility provides comprehensive logistics and repair services for a wide range of electronics products. Serving the Australia region for 25 years, the SGS logistics and repair center provides support for products across several markets specializing in mobile computing, communications networks, and radio and wireless

scanning devices. Some of these products are encrypted or partially encrypted for professional and government customers. Additional services include inventory management, logistics, product repairs, component level repair, software configuration and programming, recycling and other aftermarket services. Many products can be repaired or deployed to customers in Australia via same-day or next-day shipping. SGS manages these next-day deliveries or replacements to some of the world's largest brands.

### Advanced Logistics and Repair

Sanmina is the premier partner for integrated manufacturing solutions and end-to-end services for Original Equipment Manufacturers (OEMs). The Sanmina Global Services (SGS) organization enables customers to concentrate on their core business while SGS optimizes their supply chain. Having become one of the world's most advanced logistics and repair organizations, SGS creates value by offering deployment and aftermarket services, end-of-life solutions and engineering services. With one global IT system, SGS delivers real-time information and reporting, optimizing supply chain assets and costs for customers. The SGS global footprint consists of 28 sites and more than 30 partner-managed locations spanning 38 countries and six continents.

# Sanmina Worldwide
