

SANMINA

Sanmina Global Services (SGS) Fort Mill, South Carolina

Logistics, Repair & Engineering for Medical & Other Complex Products

The Sanmina Fort Mill, South Carolina facility provides comprehensive repair and logistics solutions for North American and international customers, specializing in the repair and engineering of medical and other complex products. We offer a full range of services including returns management, product screening, repair and refurbishment for complex electromechanical subassemblies and complete systems. As one of our medical product centers of excellence, this facility helps some of the world's most innovative medical companies significantly reduce their repair costs by consolidating repair service centers, improving operations performance, and bringing together superior engineering personnel and services. We have substantial experience with complex CT, X-Ray, MR, Nuclear Medicine and Blood Diagnostic products, among others. Sanmina Fort Mill has the expertise to manage sustaining engineering services that include obsolescence management and product engineering. Sanmina is the premier provider of integrated manufacturing solutions and end-to-end services.

Integrated Manufacturing Services - Sanmina is the premier partner for integrated manufacturing solutions (IMS) and end-to-end services for Original Equipment Manufacturers (OEMs). Our Sanmina Global Services (SGS) organization enables customers to concentrate on their core business with Sanmina optimizing their supply chain. Having become one of the world's most advanced logistics and repair organizations, SGS creates value by offering deployment and after-market services, end-of-life solutions and engineering services. With a single, global IT system, SGS ensures real-time information and reporting that helps extend and optimize our customers supply chain. Our global footprint consists of 28 SGS sites and more than 30 partner-managed locations spanning 38 countries on six continents.

REPAIR & REFURBISHMENT SERVICES
