

SANMINA

Sanmina Global Services (SGS) Penang, Malaysia

Providing Logistics and Repair for Mobile and Telecommunications Products

Our Penang, Malaysia facility is strategically located, providing comprehensive forward and reverse logistics for a wide variety of products in Asia. This location offers a range of services including product configuration, software updates, inventory management, returns management, screening, repair and refurbishment — from components to full systems. SGS Penang has over a decade of experience providing engineering services including test development and complex product debug. With sophisticated capabilities such as high density semi-automated BGA (ball grid array) equipment, we are able to develop and deliver repair processes for the most advanced products and provide these and other services across 12 countries in Asia.

Advanced Logistics and Repair - Sanmina is the premier partner for integrated manufacturing solutions and end-to-end services for Original Equipment Manufacturers (OEMs). Our Sanmina Global Services (SGS) organization enables customers to concentrate on their core business, with Sanmina optimizing their supply chain. Having become one of the world's most advanced logistics and repair organizations, SGS creates value by offering deployment and after-market services, end-of-life solutions and engineering services. With a single global IT system, SGS delivers real-time information and reporting, optimizing supply chain assets and costs for our customers. Our global footprint consists of 28 Sanmina Global Services sites and more than 30 partner-managed locations spanning 38 countries on six continents.
